

## Nortel 920-111 Exam

**920-111: NCSS-VoIP Communication Server(CS)2100**

**Practice Exam:** 920-111 Exams

**Exam Number/Code:** 920-111

**Exam Name:** NCSS-VoIP Communication Server(CS)2100

**Questions and Answers:** 82 Q&As

**( Other Nortel Certification )**

Exam : [920-111](#)

We provide professional Nortel 920-111 exam information and free demo for 920-111 certification exam's PDF. It is the best and the latest Nortel Practice Exams. Download our 920-111 PDF. We are committed to your ongoing success. Free PassBible 920-111 exam and 920-111 Q&As are constantly being updated and compared to industry standards.

### **PassBible Test tool's advantages:**

#### **High Quality and Value of 920-111 exam**

PassBible Nortel Other Nortel Certification 920-111 Practice Questions is developed and finished by Nortel technical team , cover every field of the exam . Besides, we have verified 920-111 answers,almost 100% correct.

#### **100% Guarantee to Pass 920-111 Exam**

We promise to give you FULL REFUND if you fail the Other Nortel Certification 920-111 certification(Nortel Certified Network Associate) with the use of our PassBible testing engine.

#### **920-111 Self Test Mode**

PassBible provides a simulated and interactive environment where you can test your knowledge and skills about 920-111 to ensure enough assurance in real testing center.

#### **Periodic Updates of PassBible 920-111**

Once there is some change on Nortel 920-111 exam, we will update it timely, and the product you buy will be updated within 90 days for free.

#### **Professional and Efficient Service**

We offer 7\*24 customer support via diverse channels: LIVE CHAT,MAIL.Expecting the communication with you about IT certification.

This 920-111 pdf demo do not include the questions and answers's picture.

Exam : Nortel 920-111

Title : NCSS-VoIP Communication Server(CS)2100

1. In the CS 2000 Management Tools, you are about to apply a patch. If the SpApp check box is checked, what must you do before applying the patch?

- A. Don't do anything. Apply the patch.
- B. Uncheck the check box before continuing.
- C. Display the Special Application instructions before continuing.
- D. Check for the availability of Spare Application cards before continuing.

Answer: C

2. Which management system is used as an Application Launch Point to access the SAM21 Shelf Controller Manager?

- A. Call Agent Management (CAM) System
- B. CS 2100 Element Manager Web Server
- C. Network Patch Management (NPM) System
- D. Succession Element and Sub-element Management (SESM) System

Answer: D

3. In the CS 2000 Management Tools, you need to access the Network Patch Manager (NPM) and issue critical commands. If the Graphical User Interface (GUI) is unavailable, what must you do?

- A. Contact your next level of support.
- B. Reset the associated hardware to restart the GUI.
- C. Contact Nortel support and have them connect remotely to issue the commands.
- D. Use the Command Line User Interface (CLUI) from the Operations, Administration and Maintenance (OAM) platform.

Answer: D

4. When you replace a SAM 21 Shelf Controller the new shelf controller will auto-provision. However, what must you change manually using the SAM 21 Shelf Controller Manager?

- A. the IP address of the physical Shelf Controller card
- B. the directory path, relative to the SDM, where the software load is stored
- C. the Physical Media Access Control (MAC) address of the Shelf Controller card
- D. the IP address of the SDM that contains the Shelf Controller and application card software loads

Answer: C

5. Nortel recommends an IP addressing scheme for Call Agent and other call processing nodes in the Communication Server LAN (CS-LAN). Given this information, which manner should you use to provision the nodes in a CS 2100 Compact Server solution?

- A. in a predetermined Class A address network
- B. in a private call processing subnet of the CS-LAN
- C. in the widely known IP address range of 192.168.0.x
- D. each node is provisioned within its own special subnet of the CS-LAN

Answer: B

6. What is the Call Agent software delivery procedure in a CS 2100 Compact Server?

- A. Both loads are transferred to the customer site using HTTP.
- B. Product Computing Module Load (PCL) is transferred via FTP while NCL is transferred via HTTP.
- C. Both loads are transferred to the customer site using the SuperNode Data Manager (SDM) tape or FTP.
- D. PCL is transferred directly on the Call Agent card via FTP while NCL is transferred to the customer site using SDM.

Answer: C

7. The Gateway Controller (GWC) requires information so that it can communicate with Call Agent. When a GWC is added using the CS 2100 Management Tool, an IP address is entered in the Message Router IP field. What does this IP address belong to?

- A. the Local PTP IP address
- B. the Mate Port 0 IP address
- C. the Local Port 0 IP address
- D. the Call Agentactive IRM IP address

Answer: D

8. You need to access the Application Launch Point for the SAM21 Shelf Controller Manager. After you launch a web browser to the following link: <http://<host>>, what do you input for <host>?

- A. the SAM21 Network Element

- B. the IP address of the Mate Controller
- C. the IP address of the SAM21 Shelf Controller
- D. the name or IP address of the CS 2000 Management Tools Server

Answer: D

9. What is the purpose of Peripheral Processor Virtual Machine (PPVM) protocol in a CS 2100 XA-Core Server configuration?

- A. communication between XA-Core and Call Agent
- B. communication between Universal Audio Server (UAS) and Audio Gateway Controller
- C. communication between XA-Core and Interworking Spectrum Peripheral Module Internet Protocol (IW SPM-IP)
- D. communication between Call Agent and Interworking Spectrum Peripheral Module Internet Protocol (IW SPM-IP)

Answer: C

10. A customer is planning to install a hybrid CS 2100 XA-Core Server solution. What is the required hardware component that is used to provide a system bus for peer-to-peer messaging between the XA-Core and the SuperNode Data Manager in this deployment?

- A. a Mediatrix 1124
- B. a Message Switch
- C. a Passport 7480 Packet Voice Gateway
- D. a SAM21 shelf with a Message Controller (MC) blade

Answer: B

11. From the STORM Manager Storage Panel window, when should you execute removal of a file system?

- A. after regular working hours
- B. after testing file system integrity
- C. only at the direction of Nortel support personnel
- D. when file systems can be safely removed at any time without effecting the operation

Answer: C

12. Which feature is applicable only for a CS 2100 Compact Server configuration?

- A. Call Agent
- B. HIOP Module
- C. SuperNode Size Enhanced (SNSE)
- D. Support for DS1 and DS3 Telephony Protocols

Answer: A

13. There are two tables in the call processing application that require datafill before the components in the LAN can communicate with the Call Agent. One is Table IPHOST, what is the other?

- A. Table IPINV
- B. Table NETINV
- C. Table SERVRINV
- D. Table IPNETWRK

Answer: D

14. A customer is planning to install a hybrid CS 2100 XA-Core Server solution. What is the required hardware component(s) for supporting the Interworking Spectrum Peripheral Module Internet Protocol (IW SPM-IP) in this deployment?

- A. a Motorola PowerPC series FX
- B. Gateway Controller circuit cards
- C. a Motorola MCPN Single Board Computer (SBC) with MultiMode Fiber connections to the Passport 8600 network
- D. a legacy-based, fault-tolerant peripheral with DS512 connection to the ENET and Gigabit Ethernet connections to the packet network

Answer: D

15. A private LAN is established between two Call Agent cards and uses the 192.168.1.0 network in a CS 2100 Compact Server system. Which ports on the two Call Agent cards use this network?

- A. localptp and mateptp
- B. localport0 and mateport0
- C. localport1 and mateport1
- D. localblade and mateblade

Answer: A

16. A customer is planning to install a Greenfield CS 2100 Compact Server solution. What is the required hardware component for the Trunk Gateway Media Controller in this deployment?

- A. a SAM21 Shelf
- B. a Mediatrix 1124
- C. a 1104 Analog Station Gateway
- D. a Passport 7480 Packet Voice Gateway

Answer: D

17. What do the items displayed on the SAM21 Shelf Controller Manager Network Element display represent?

- A. a SAM21 Shelf
- B. a CS 2100 XA-Core System
- C. a CS 2100 Compact System
- D. a SAM21 Shelf Controller Card

Answer: A

18. A customer is planning to install a Greenfield CS 2100 Compact Server solution. What is the required hardware component for the Call Agent component in this deployment?

- A. a Mediatrix 1124
- B. a STORM SAM-XTS server unit
- C. an AudioCodes Mediant Gateway
- D. a Single Board Computer (SBC) that resides in a SAM21 shelf

Answer: D

19. When you select a file system from the STORM Manager Storage Panel window, a Modify File System window appears. From this Modify window, how can you modify the size of a file system?

- A. You can increase or decrease the size as you see fit.
- B. You can modify the size only in increments of 100 MB.
- C. You can modify the size by selecting the slide-bar and moving it to the new value.
- D. You are allowed to increase the size of a file system; however, you are not allowed to decrease the size.

Answer: D

20. You need to reconfigure the IP addresses of both Call Agent cards in a CS 2100 Compact system. You have the following base-eight consecutive IP address range for the two Call Agents:

- 142.68.156.25
- 142.68.156.26
- 142.68.156.27
- 142.68.156.28
- 142.68.156.29
- 142.68.156.30
- 142.68.156.31
- 142.68.156.32

In the base-eight IP address range, which one must you assign as ACTIVEIRM?

- A. 142.68.156.25
- B. 142.68.156.26
- C. 142.68.156.31

D. 142.68.156.32

Answer: D
