

Nortel 920-807 Exam

920-807: Nortel Unified Communications Solutions

Practice Exam: 920-807 Exams

Exam Number/Code: 920-807

Exam Name: Nortel Unified Communications Solutions

Questions and Answers: 56 Q&As

(Other Nortel Certification)

Exam : [920-807](#)

We provide professional Nortel 920-807 exam information and free demo for 920-807 certification exam's PDF. It is the best and the latest Nortel Practice Exams. Download our 920-807 PDF. We are committed to your ongoing success. Free PassBible 920-807 exam and 920-807 Q&As are constantly being updated and compared to industry standards.

PassBible Test tool's advantages:

High Quality and Value of 920-807 exam

PassBible Nortel Other Nortel Certification 920-807 Practice Questions is developed and finished by Nortel technical team , cover every field of the exam . Besides, we have verified 920-807 answers,almost 100% correct.

100% Guarantee to Pass 920-807 Exam

We promise to give you FULL REFUND if you fail the Other Nortel Certification 920-807 certification(Nortel Certified Network Associate) with the use of our PassBible testing engine.

920-807 Self Test Mode

PassBible provides a simulated and interactive environment where you can test your knowledge and skills about 920-807 to ensure enough assurance in real testing center.

Periodic Updates of PassBible 920-807

Once there is some change on Nortel 920-807 exam, we will update it timely, and the product you buy will be updated within 90 days for free.

Professional and Efficient Service

We offer 7*24 customer support via diverse channels: LIVE CHAT,MAIL.Expecting the communication with you about IT certification.

This 920-807 pdf demo do not include the questions and answers's picture.

Exam : Nortel 920-807

Title : Nortel Unified Communications Solutions

1. Which unified communications application, when implemented, can successfully solve the time value of money business challenge for bank and financial institutions attempting to provide customers with faster loan approvals?

- A.self-service websites enabled with IM chat
- B.real-time unified messaging with key loan personnel
- C.reservation-less audio conferencing
- D.real-time collaboration with key loan personnel

Answer: D

2. Which statement supports why a project team should conduct the requirements definition prior to the unified communications (UC) proof-of-concept project scope of work definition?

- A. It helps identify a short-list of vendor UC solutions that can be incorporated into the UC project.
- B. It slows down the UC proof-of-concept project from moving forward due to internal politics.
- C. It provides a detailed project plan defining project milestones and timelines.
- D. It identifies the scope of the UC project for labor estimating and project planning.

Answer: D

3. Installation of Office Communications Server (OCS) 2007 requires the extension of the active directory domain services schema so that creation and configuration of objects in the Active Directory can take place. Which two active directory objects are necessary for OCS 2007 to operate? (Choose two.)

- A. home telephone number
- B. session initiation protocol (SIP) URI
- C. telephone extension number
- D. fully qualified domain name

Answer: BC

4. A company has an existing traditional TDM PBX and wishes to implement a unified communications project. At the present time it is more feasible to add a second VoIP-enabled PBX into the existing configuration to complete the project rather than replace the existing system. To make this system work as designed, the company must purchase and configure which other piece of hardware for this solution?

- A. Router
- B. IP gateway
- C. New telephone sets
- D. This solution is not possible

Answer: B

5. When determining whether to proceed with a unified communications proof-of-concept project, which steps are decision points for a Chief Financial Officer? (Choose two.)

- A. creating an acceptable UC project budget
- B. defining who should be on the UC project team
- C. obtaining an acceptable preliminary financial ROI return
- D. developing a UC project plan that spans 6 to 9 months

Answer: AC

6. In an Office Communications Server (OCS) 2007 Enterprise Edition environment, which solution increases the availability of OCS 2007 services?

- A. deployment of a mediation server
- B. deployment of an archiving server
- C. deployment of edge servers
- D. deployment of a load balancing technology with the OCS 2007

Answer: D

7. Dual mode devices are devices that can utilize the carriers mobile data network or a local corporate Wi-Fi hotspot. Which reason is the primary reason for using such a device in a corporate environment?

- A. to enhance security
- B. to ease access to data
- C. to simplify the use of applications
- D. to reduce carrier usage and per minute charges

Answer: D

8. A unified communications pilot project financial return on investment (ROI) model must have access to the organizations accurate sales, general, and administrative overhead expenses. Which decision criterion is critical for a Chief Financial Officer prior to signing-off on the preliminary financial ROI model?

- A. acceptance of key performance indicators with metrics

- B.determining the length of time that the UC proof-of-concept pilot project ROI must make
- C.identifying and validating all associated costs and that they are correctly entered into the ROI model
- D.planning on whether to use CAPEX or OPEX to pay for the UC proof-of-concept project

Answer: C

9. In the review and validation steps of a unified communications proof-of-concept scope of work document, which task should be completed first?

- A.Create upper management reporting templates.
- B.Measure key performance indicators (KPI) for reporting purposes.
- C.Create a monthly project assessment template to collect UC project data points.
- D.Calculate the financial return on investment (ROI) benchmarks.

Answer: C

10. Every mobile device that uses a wireless connection should employ point-to-point encryption between the endpoint mobile device and the enterprise network.

Which two methods will support point-to-point encryption? (Choose two.)

- A.IPsec VPN
- B.the cellphone service provider
- C.native SIP
- D.using WPA and WPA2 security

Answer: AD

11. In some cases IP gateways are required in a pure IP PBX environment. Where in the network would the IP gateway be placed, if one were required?

- A.between the IP PBX and the carrier
- B.between the IP call server and its associated gateways
- C.between the IP PBX and any firewalls
- D.an IP gateway is not required in a pure IP PBX solution

Answer: A

12. When making a decision to deploy a multi-vendor unified communications enabled solution using SIP, what should the enterprise IT support teams do in preparation for the project?

- A.Fully test the solution for interoperability.
- B.Ask management to consider a single vendor.
- C.Look for open source tools to manage the solution.
- D.Request that all vendors adhere to strict common standards.

Answer: A

13. Given that several VoIP protocols have been used for communications between end-point devices, which protocol is versatile enough to act as the signaling protocol for mobile, fixed, and software-based end-point devices?

- A.MGCP
- B.SIP
- C.H.323
- D.SGCP

Answer: B

14. A company that is implementing unified communications (UC) has a mobile workforce that utilizes mobile end point devices such as PDA devices. Which security method will be needed to secure UC dialogue between the PDA devices?

- A.Authentication
- B.Encryption
- C.One time passwords
- D.RFID tagging and tracking

Answer: B

15. When paired with a Communication Server 1000 PBX, the Microsoft Office Communicator client uses a feature called twinning or dual-forking.

What is twinning?

- A. a type of conference call
- B. two telephones sharing a single extension number
- C. telephone set cloning
- D. two users sharing an extension number

Answer: B
